LONG EFFORT FRUITLESS

Wethersfield, Conn.- Walter Gorden, 48, prisoner at the State Prison, is a most disconsolate man. After six months of effort with a 4-inch file, he sawed through the steel hinge pins of his cell door, pushed it open and began to scale the tier grillwork to the roof. A guard spotted him and pulled him down. Now, he is in solitary and faces a possible extra sentence on top of the maximum 70 years he already is serving.

FLY CONTROL ON DAIRY CATTLE MADE EASIER

A simple and easy way to control horn flies on dairy cattle is suggested by entomologists at VPI.

They say to simply hand-sprinkle 50 per cent methoxychlor wettable powder lightly over the backs of the cattle. In studies on this method, control was obtained for two to four weeks. This method does not upset, the cattle as spraying will do, and no spray equipment is needed. The methoxychlor applied in this manner will control only horn flies and does not seem to control stable flies and horse flies at all.

The entmologists also say that backrubbers show promise in controlling horn flies on beef cattle, and are being evaluated at this time.

During the summer of 1956, eight different insecticides were tested in dairy barns for control of house flies. Of all the materials tested, diazinon was the most effective, giving control for more than eight weeks after spraying. The same materials caused a reduction of the horn flies on the dairy cows being brought into the sprayed barn for milking and feeding.

FAMILY GROWS

Mobile, Ala.- Mrs. C. A. Blackwell and her daughter, Mrs. J. T. Dunn, Jr., entered Mobile Infirmary at the same time the other day. Mrs. Blackwell, 37, gave birth to a daughter, twelve hours after Mrs. Dunn had given birth to a son. That means that C. A. Blackwell became a father and a grandfather the same day; Mrs. Blackwell became a mother and grandmother; and that Mrs. Dunn became a mother and a sister, and that baby Frankie Lavell Blackwell became a daughter and an aunt.

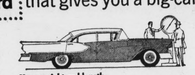
How come the new Ford rides so smooth and solid?

It's the new inner Ford that gives you a big-car ride at low Ford prices

● Folks just naturally love Ford's lower, sleeker silhouette. And they love Ford's new Thunderbird V-8's and Mileage Maker Six. But the thing that's *really* got 'em buzzing is Ford's new ride. In the new kind of Ford, vital riding features team up to give you the smoothest going in the whole *ride* world. For example:

New automatic variable-rate rear springs
Going from a highway to a byway in a Ford, is like going from satin to silk. New design allows Ford's rear springs to "soften" or "stiffen" depending on road conditions. You get a smooth ride all the way!



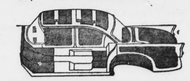
More weight and length
Heed for the roughest road in the new kind of Ford. Notice how the biggest bumps lose their "thump"! One reason is that this biggest, longest, heaviest Ford has the extra "heft" to give a smooth, road-hugging ride.

Better balance
One of Ford's nicest back-road habits is to make believe the rough spots aren't there. Proper weight distribution and precise balancing let Ford iron out bumps far better than many of the higher-priced cars.

New swept-back Ball-Joint front suspension
Ford's new, stronger front suspension is designed to soak up the shock of rough roads. The new swept-back design lets wheels "roll" with the bumps and absorb it going away . . . for far smoother, steadier sailing.

New lower-pressure tires
Even Ford's tires are new for a better ride! Although they require less air pressure, they hold about 17% more air for cushioning the car. This means a softer ride—without sacrifice of Ford's good handling characteristics.

More comfortable seating
There's no sag when you sit in a Ford . . . even on long trips. Comfort-contoured seats, rigidly anchored, have advanced springing for greater comfort and longer life.



More body insulation
Ford has more body insulation—protection against weather, dust, and noise—than any car in the low-price field. You ride through city traffic in library-like quiet.

No metal-to-metal chassis and body contact
Only Ford in its field uses 20 Cushion Quiet rubber body mounts . . . more than any other low-priced car. It all adds up to a smoother, quieter riding car.

Try the new kind of ride in the new kind of FORD
